Explanations	

As is known to the public, our Company's efforts to expand its Electric Vehicle Charging Station Network under the G-Charge Brand continue at full speed. In this context, information regarding the tender process of Bursa / Nilüfer Municipality had previously been submitted to the public. Currently, negotiations and initiatives for the installation of charging stations with many public/private persons and institutions are also ongoing.

Within the scope of the said efforts, as a result of the cooperation negotiations that have been ongoing for some time between our Company and EGAZ LPG Dağıtım A.Ş. for the development and expansion of the Electric Vehicle Charging Operations carried out under the G-Charge Brand, it has been decided to take the necessary initiatives for the installation and operation of G-Charge Electric Vehicle Charging Stations at approximately 180 Dealer Locations within EGAZ LPG Dağıtım A.Ş. and/or its distribution network.

Within this scope, a cooperation agreement has been signed between GERSAN ŐARJ SİSTEMLERİ SANAYİ ve TİCARET A.Ő., a subsidiary within our Company, and EGAZ LPG Dađıtım A.Ő. With the implementation of the process under the said agreement, it is aimed that the G-Charge Brand will become more accessible in many provinces and districts throughout our Country and that, together with the increase in the Company's brand value and recognition, it will have a positive effect on its activities and profitability.

Respectfully announced to the public.

We hereby declare that our above statements are in compliance with the principles set forth in the Capital Markets Board's Communiqué on Material Events currently in force, that they fully reflect the information received by us regarding this matter/these matters, that the information is in accordance with our books, records and documents, that we have made all necessary efforts to obtain the relevant information fully and accurately, and that we are responsible for these statements.
