Material Terms of the Agreement, if any	None.
Effect of the New Business Relationship on the Partnership's Activities	It will make a positive contribution to the Company's activities.
Explanations	

As is also well known to the public, electric vehicle charging stations are among our Company's production items. In addition to our existing production activities, our efforts to develop new-generation electric vehicle charging stations with advanced technology and high capacity are continuing without interruption in order to meet evolving and changing market needs.

Within this scope;

A cooperation process was carried out between our Company and OTOJET ENERJİ, which was initiated in 2025 and has been ongoing for some time, for the purpose of testing the new model electric vehicle charging stations, whose development process is continuing, in the field and under active usage conditions.

Within the framework of the said cooperation, new-generation devices were installed for testing purposes at two separate locations operated by OTOJET ENERJİ, and comprehensive testing processes were carried out meticulously.

At the current stage, the testing processes conducted together with OTOJET ENERJİ have been successfully completed.

Following the successful completion of the testing process, a 3 (three)-year agreement, the general framework of which is set out below, has been signed between our Company and OTOJET ENERJİ:

Although the parties have primarily reached mutual agreement on the sale to OTOJET ENERJİ of the electric vehicle charging stations subject to the testing process, OTOJET ENERJİ has expressed its intention to continue its cooperation with our Company by obtaining quotations from our firm in its procurement processes for 2026 and thereafter.

We would like to thank the OTOJET ENERJİ family for the significant support they have provided to the cooperation with their dedication, experience and valuable contributions throughout the process.

Respectfully announced to the public.

We hereby declare that our above statements are in compliance with the principles set forth in the Capital Markets Board's Communiqué on Material Events currently in force, that they fully reflect the information received by us regarding this matter/these matters, that the information is in accordance with our books, records and documents, that we have made all necessary efforts to obtain the relevant information fully and accurately, and that we are responsible for these statements.
