Is this disclosure a postponed disclosure?	No
Content of the Disclosure	
Explanations	

Within the scope of our Company's Green Energy investment plans,

For the first project, namely the Rooftop SPP (Solar Power Plant) Investment project with a capacity of 2.6 MW at our GERSAN Çaycuma Factory, the necessary technical and administrative feasibility studies and legal infrastructure have been completed, and the necessary permits have been obtained from the relevant public authorities. Within this scope, pursuant to the resolution adopted by our Company's Board of Directors on 22.07.2025 for the realization of the relevant investment, the tender process for the implementation of the said investment will be initiated as of 23.07.2025. With the implementation of the Rooftop SPP project, it is aimed to minimize our Company's energy expenses and to generate additional income for the Company through the sale of surplus production.

Respectfully announced to the public.

We hereby declare that our above statements are in compliance with the principles set forth in the Capital Markets Board's Communiqué on Material Events currently in force, that they fully reflect the information received by us regarding this matter/these matters, that the information is in accordance with our books, records and documents, that we have made all necessary efforts to obtain the relevant information fully and accurately, and that we are responsible for these statements
