Is this disclosure a postponed disclosure?	No
Content of the Disclosure	
Explanations	

As a result of the works carried out at our Gersan Elektrik Production Factory, our production facility located in Zonguldak / Çaycuma has met the criteria determined by the U.S. Green Building Council (USGBC) and has become entitled to receive Gold-level certification under LEED v4.1 O+M: Existing Buildings, and the certification was approved as of March 2026.

LEED certification is of great importance in terms of improving energy performance, reducing environmental impacts and verifying our sustainable operation approach at international standards.

We hereby declare that our above statements are in compliance with the principles set forth in the Capital Markets Board's Communiqué on Material Events currently in force, that they fully reflect the information received by us regarding this matter/these matters, that the information is in accordance with our books, records and documents, that we have made all necessary efforts to obtain the relevant information fully and accurately, and that we are responsible for these statements
